Narcan:

Opioid Overdose Reversal Training

June 30 (11AM to Noon ET via Zoom)

Participants will learn:

- How to recognize harm-reduction approaches to high-risk behaviors, including substance use
- The importance of substance use narratives
- The immediate protocols for effectively administering Naloxone (Narcan), the life-saving medication developed to help prevent fatal opioid overdoses
- The importance of the Good Samaritan Act 139 and the Commonwealth of Pennsylvania’s Standing Order for Naloxone (Narcan)
- To view addiction as a chronic disease
